Subject: Re: Reentry Report from Dr. Burraston

Thanks for those important points, Blair.

I understand the new proposal isn't to implement or evaluate the same program. My reason for forwarding Dr. Burraston's report was to increase awareness of variables inherent in the system that may have hindered that program's implementation and/or evaluation (i.e., data availability, data quality, etc.). We would need to make sure these systemic challenges were addressed in any future program implementation and evaluation.

Thanks,
AM

- 1) Remember that we are not going to be implementing (or evaluating) this same program that was evaluated before. We are going to be implementing and evaluating a totally new program that will be funded by a WIN grant.
- 2) Brona, please email me the outcomes document that we amended during the last meeting with your take on what the group felt should be amended. I recall Bill saying he thought we'd changed everything, but that was not my takeaway, so I'd like to provide some additional written input.
- 3) Kevin said he would pay for evaluation – and it may make sense to have a partnership with MDRC or other entity that has evaluated the CEO type of program (in fact if WIN selects CEO as the vendor which I frankly hope they will, they have been evaluated by MDRC)

Thanks all!

I hate to say it, but we probably need to have a meeting with him.

Also, this might be one of those Objectives in the plan where we need to organize a formal working group to make sure it is (1) being carried out properly so that it can be effectively evaluated going forward and (2) that we are getting the data we need.

Finally, do you know whether Dr. Burraston has funding to continue an evaluation, or do we need to use some of our funding for that ?

Bill

FYI...

Interesting discussion of potential issues that could make evaluation more challenging.

Happy New Year!
